DEVELOPMENT OF OXYGENATED HYDROCARBON-BASED CO₂- SOLUBLE POLYMERS

Condition: New. Publisher/Verlag: VDM Verlag Dr. Müller | Using CO₂ as a Green Solvent | Recently the use of sub/supercritical CO₂ has received much attention as a green alternative to organic solvents for chemical processes because of its pressure-tunable physicochemical properties and economic advantages. But, the advantages are diminished because of a narrow range of CO₂-soluble materials. The goal of this work is to identify and design oxygenated hydrocarbon-based CO₂-soluble polymers that are able to serve as construction blocks for...
