A HYBRID CORE-SHELL RHOP-1 NANOPARTICULATE DELIVERY SYSTEM

LAP Lambert Acad. Publ. Jul 2010, 2010. Taschenbuch. Condition: Neu. Neuware - Distraction osteogenesis (DO) is a prevalent surgical technique for the correction of congenital orthopaedic deformities and craniofacial developmental conditions. Yet, clinical benefits continue to be limited by a number of complications mainly as a result of the protracted treatment time during which the fixator has to be kept in situ until the newly-formed bone in the distracted zone consolidates (or hardens), thus exacerbating significant medical, psychological and socio-economical...
