THE DENSITY MATRIX OF H2-N2, IN THE COORDINATE REPRESENTATION: A MONTE CARLO CALCULATION OF THE FAR-WING LINE SHAPE

The Density Matrix of H2-N2, in the Coordinate Representation: A Monte Carlo Calculation of the Far-Wing Line Shape

NASA Technical Reports Server (NTRS), Q. Ma, R. H. Tipping

BiblioGov. Paperback. Book Condition: New. This item is printed on demand. Paperback. 38 pages. Dimensions: 9.7in. x 7.4in. x 0.1in. The far-wing line shape theory within the binary collision and quasistatic framework has been developed using the coordinate representation. Within this formalism, the main computational task is the evaluation of multidimensional integrals whose variables are the orientational angles needed to specify the initial and final positions of the system during transition processes. Using standard methods, one is able to evaluate the...

Reviews

It is an amazing publication which i actually have at any time go through. It really is written in easy words and phrases rather than hard to understand. Its been developed in an extremely easy way which is merely following i finished reading through this pdf in which actually changed me, affect the way i think.

-- **Garry Lind**

Simply no words and phrases to clarify. It really is full of knowledge and wisdom You wont feel monotony at at any moment of the time (that's what catalogs are for relating to when you question me).
